

AMNIOSOMES™

Pure and Potent Amnio Exosomes

For licensed practitioners only.

- ✓ Amniosomes™ are sourced from pre-screened single donors in compliance with HCT/Ps for donor suitability per 21 CFR 1271.10 including screening for SARS-CoV-2.
- ✓ Amniosomes™ is an acellular human allograft of amnio derived extracellular vesicles that are preserved in their natural state suspended in clarified amniotic fluid.
- ✓ EVs are signaling messengers of miRNA, RNA, peptides, growth factors and more. EV surface marker confirms high levels of CD9, CD63 and CD81.
- ✓ The most POTENT beneficial EVs are targeted and retained.
- ✓ Particulate debris are carefully filtered out for the most PURE EV product.
- ✓ Cryopreservation to preserve proteins.
- ✓ Manufacturer is an FDA registered facility in compliance with 21 CFR1271.10(a), PHS 361 and per AATB, GMP, cGMP, and cGTP guidelines.
- ✓ FDA IND application submission April 14, 2020.

For homologous use only.
