

Anodyne Therapy Model 480 Pro

For Post RICHGEN[®] Joint Injection Sites

The Anodyne Therapy Model 480 PRO is the premium infrared light therapy product designed for use by healthcare professionals. The Model 480 PRO allows healthcare professionals to adjust the intensity of infrared energy output to most effectively treat acute and chronic pain. The Model 480 Pro also allows healthcare professionals to treat multiple locations where the patient experiences pain (such as the elbow and hand) or to treat two patients at one time. This lightweight and portable product also offers the following:

- Hands-free treatment using Anodyne application systems
- 8 separate therapy pads each containing 60 infrared diodes
- Calibration and certifications for regulatory compliance
- Online staff training, clinical protocols and support
- Durable carrying case
- FDA-cleared
- 2 year warranty
