

Amnio Sourced Nano Particulates

For clinical trials & research and licensed practitioners only.

- ✓ Amnio Sourced Nano Particulates (ANP) are sourced from pre-screened single donors in compliance with HCT/Ps for donor suitability per 21 CFR 1271.10 including screening for SARS-CoV-2.
- ✓ ANP comprise an acellular human allograft that are preserved in their natural state suspended in clarified amniotic fluid.
- ✓ ANP are signaling messengers of miRNA, RNA, peptides, growth factors and more. ANP surface marker confirms high levels of CD9, CD63 and CD81.
- ✓ The most POTENT beneficial ANP are targeted and retained.
- ✓ Particulate debris are carefully filtered out for the most PURE ANP product.
- ✓ Cryopreservation to preserve proteins.
- ✓ Manufacturer is an FDA registered, cGMP facility in compliance with 21 CFR1271.10(a), PHS 361 and per AATB, GMP, cGMP, and cGTP guidelines.
- ✓ FDA IND application submitted for SARS-CoV-2. Applications for research and other clinical studies in process.
